Sorry I forgot to bring this up yesterday too. yes, you are correct. It wouldn't be appropriate for us to be a signatory. If there were any "red flags", I would want to raise them but I don't see any. (I don't see any projects in the vicinity that Paul Jones is worried about for Swaison's Hawk mitigation under South Sac HCP, do you?) - Karen

Subject: Fw: DEADLINES APPROACHING: YOUR DELTA PROJECTS SIGN-ON LETTER

Hi Karen,

I sent this out earlier this week, but as I was checking my messages this AM I realized I should really follow up with you on it.

This is a list of Delta Projects that the participants in this group are signing on for their support. The cover letter is pretty brief if you want to take a look. We discussed this a few months back and I understood that we were involved for informational purposes not really to sign on as support for the projects. I just want to check in and make sure that is correct.

Here are the basic criteria to get on the list

- A. Projects that have wide support
- B. Projects that can be on line within 5 to 10 years
- C. Projects that are "no risk or low risk for any regrets" and do not prejudice the outcome of BDCP or Delta Stewardship Plan
- D. Projects that can be funded
- E. Projects supported by local landowners
- F. Projects we could learn from
- G. Projects that are designed or refined/redesigned to avoid impacts and provide multiple benefits
- H. Projects supported by science, and that come with specific monitoring or performance criteria, but absolute certainty of outcome not possible or required

Some of the projects on the list will probably need CWA permits from the Corps and some will possibly have NEPA documents reviewed by CED.

Erin Foresman

Subject: DEADLINES APPROACHING: YOUR DELTA PROJECTS SIGN-ON LETTER

(See attached file: Delta Coalition.Transmittal Letter 09.28.12.doc)

(See attached file: Delta Coalition Projects Table 1. 09.28.12.xlsx)

(See attached file: Delta Coalition Projects Table 2. 9-28-12.pdf)

(See attached file: Signatories as of 10.04.12.Delta Projects Coalition.xlsx)

Dear Delta Projects Coalition Participants,

Deadlines regarding your involvement in the Delta Coalition are fast approaching:

Monday, October 8, 5 pm: Project proponents should review project information in Attachments 2 and 3 above for accuracy and email back corrections. Otherwise, we will assume the information is correct.

THURSDAY, OCTOBER 11, 5 PM: Last day to be a signatory to the Transmittal Letter (Attachment 1). Attachment 2 and 3 above will be included with the Transmittal Letter. PLEASE NOTE:

Ø Please email an electronic signature for the transmittal letter if you have already or are going to sign.

Ø Those who have already signed as of 10/4/12 are listed in last attachment above.

For more specifics on the context for the above deadlines, please see the email below.

Best regards,
Susan Sherry, Facilitator

Subject: YOUR DELTA PROJECTS SIGN-ON LETTER

Dear Delta Coalition Participants:

On Wednesday, September 26th, individuals participating in the Coalition achieved a major milestone! The group identified a list of Near Term Delta projects that they support moving forward in the process(es). The group also approved the content of a final transmittal letter that expresses what they mean by "support to move forward in the process(es)."

This email has two purposes:

1) To provide the opportunity for those not present at the meeting on September 26 to add their names to the transmittal letter (attached) that will accompany two tables providing information on the projects (attachments 2 and 3 above). The transmittal letter and project tables will be widely distributed. (See recipient list in letter.)

IF YOU WANT YOUR NAME TO APPEAR AS A SIGNATORY TO THE TRANSMITTAL LETTER, YOU MUST LET US KNOW VIA EMAIL, AT THE LATEST, BY 5 PM THURSDAY OCTOBER 11. (You can reply to this email.) We cannot change the content of the transmittal letter as it was the subject of extensive discussion and then approval at the September 26 meeting. If you would like more information on individual projects, visit the following website for project descriptions: <http://csus.edu/ccp/deltaprojects.zip> Please note:

- Signatories to the transmittal letters are individuals. In the letter, we will list your name, followed by your organization, with a clear indication that organizations are provided for identification purposes only.
- Only individuals from public agencies or constituency organizations can sign the letter. If you are unsure as to whether you are eligible to sign, let us know your question by replying to this email and we will get back to you. For example, a person from a private consulting firm who does not represent an agency or constituency would refrain from signing.

2) This is also your opportunity to do a final accuracy check on the information about your projects provided in the above two tables, which will be attachments to the transmittal letter. The first table provides summary information on the projects. The second table provides additional cost and timing information. Please see below for instructions on how to check Table 2 for accuracy.

ALL PROJECT PROPONENTS SHOULD REVIEW THE INFORMATION IN THE TWO TABLES AND EMAIL CORRECTIONS BACK TO US BY 5 PM MONDAY, OCTOBER 8 AS THAT WILL GIVE US THE TIME TO MAKE THESE CHANGES. (You can reply to this email.) Please describe your changes in the text of the email rather than modify the tables. If you do not get back to us, we will assume that the information on your project is correct.

As discussed at the September 26 meeting, we will organize Table 1 by the types of projects. (The types are listed at the top of Table 2.) We will also insert the readiness status of each project into Table 1, as determined by each project proponent.

Instructions for Reviewing Table 2:

1. Review the categories to be sure that the primary purpose/benefit of the project is identified with a "P." It is preferable to identify a single primary purpose/benefit. If someone must characterize a project with two primary purposes/benefits, it is fine. We can adjust the cost formulas to accommodate. Generally, we are trying to limit the levee/flood management, ecosystem, and water supply/water quality categories to on-the-ground implementation projects. Research, studies, and educational activities should be noted in the "Other" category.
2. Put an "X" in any other categories that represent additional purposes/benefits.
3. Confirm the readiness score (1-4). The legend is provided at the bottom of the table.
4. Confirm the year that implementation or construction is expected to begin.
5. Verify that the cost for the next step/next phase is correct. This number should reflect the total cost of the next step, not including any funds already spent. The yellow highlights indicate places where no number has been identified in the project proposal.
6. Verify that the total project cost is correct. This number should reflect the total estimated project cost through implementation, not including any funds already spent.

Thank you for your involvement in the Coalition.

Best regards,
Susan Sherry, Facilitator
